The company is entitled to exemption from audit under Section 477 of the Companies Act 2006 for the period ended 31 December 2025.

The members have not required the company to obtain an audit of its financial statements for the period ended 31 December 2025 in accordance with Section 476 of the Companies Act 2006.

The directors acknowledge their responsibilities for:

(a) ensuring that the company keeps accounting records which comply with Sections 386 and 387 of the Companies Act 2006 and

(b) preparing financial statements which give a true and fair view of the state of affairs of the company as at the end of each financial year and of its profit or loss for each financial year in accordance with the requirements of Sections 394 and 395 and which otherwise comply with the requirements of the Companies Act 2006 relating to financial statements, so far as applicable to the company.

The financial statements have been prepared and delivered in accordance with the provisions applicable to companies subject to the small companies regime.

In accordance with Section 444 of the Companies Act 2006, the Income Statement has not been delivered.

The financial statements were approved by the Board of Directors and authorised for issue on 7 October 2026 and were signed on its behalf by:

N C Jeavons - Director

The notes form part of these financial statements

NOTES TO THE FINANCIAL STATEMENTS
FOR THE PERIOD 1 JUNE 2025 TO 31 DECEMBER 2025

1. STATUTORY INFORMATION

Thorne International Boiler Services Limited is a private company, limited by shares, registered in England and Wales. The company's registered number is 01129729 and the registered office address is Broad Lanes, Bilston, Wolverhampton, West Midlands, WV14 0RQ.

The principal activity of the company is that of the supply of boilers, boiler spares and industrial equipment.

2. STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with the provisions of Section 1A "Small Entities" of Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the Companies Act 2006.

3. ACCOUNTING POLICIES

Basis of preparing the financial statements
The financial statements have been prepared under the historical cost convention.

Functional currency
The financial statements are prepared in sterling. The functional currency of the company is sterling.

Significant judgements and estimates
In determining and applying accounting policies, judgement is often required in respect of items where the choice of specific policy, accounting estimate or assumption to be followed could materially affect the reported results or net asset position of the company; it may later be determined that a different choice would have been more appropriate. Management considers that certain accounting estimates and assumptions relating to revenue, taxation, tangible fixed assets, provisions and contingent liabilities and accruals are its critical accounting estimates.

Trade receivables
Trade receivables are initially recognised at fair value and are subsequently measured at amortised cost less any provision for bad and doubtful debts

Trade Payables
Trade creditors are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Amounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade creditors are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

Turnover
The turnover shown in the profit and loss account represents amounts invoiced during the year, exclusive of VAT.

In respect of long-term contracts, turnover represents the value of work done in the year, including estimates of amounts not invoiced. Turnover in respect of long-term contracts and contracts for on-going services is recognised by reference to the stage of completion.

Tangible fixed assets
Depreciation is calculated so as to write off the cost of assets, less their residual value, over their estimated useful lives as follows:

Fixtures and fittings - 15% on cost
Motor vehicles - 25% on cost
Computer equipment - 33.33% on cost

On disposal, the difference between the net disposal proceeds and the carrying amount of the item sold is recognised in profit or loss, and included in other operating income.

Stock
Stock is valued at lower of cost or the net realisable value. Cost is calculated on a first in first out basis.

continued...

3. **ACCOUNTING POLICIES - continued**

Financial instruments
The company only enters into basic financial instruments transactions that result in the recognition of financial assets and liabilities like trade and other accounts receivable and payable, loans from banks and other third parties, loans to related parties and investments in non-puttable ordinary shares

Financial assets that are measured at cost and amortised cost are assessed at the end of each reporting period for objective evidence of impairment. If objective evidence of impairment is found, an impairment loss is recognised in profit or loss.

For financial assets measured at amortised cost, the impairment loss is measured as the difference between an asset's carrying amount and the present value of estimated cash flows discounted at the asset's original effective interest rate. If a financial asset has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

For financial assets measured at cost less impairment, the impairment loss is measured as the difference between an asset's carrying amount and the best estimate, which is an approximation, of the amount that the company would receive for the asset if it were to be sold at the reporting date.

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is an enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

Taxation
Taxation for the period comprises current and deferred tax. Tax is recognised in the Income Statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the statement of financial position date.

Deferred tax
Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the statement of financial position date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the period end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Foreign currencies
Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the statement of financial position date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of transaction. Exchange differences are taken into account in arriving at the operating result.

Hire purchase and leasing commitments
Rentals paid under operating leases are charged to profit or loss on a straight line basis over the period of the lease.

Pension costs and other post-retirement benefits
The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to profit or loss in the period to which they relate.

continued...

3. **ACCOUNTING POLICIES - continued**

Long-term contracts
Long-term contracts are assessed on a contract-by-contract basis and reflected in the profit and loss account by recording turnover and related costs as contract activity progresses. Turnover is ascertained in a manner appropriate to the stage of completion of the contract and the business. Where it is considered that the outcome of a long-term contract can be assessed with reasonable certainty before its conclusion, the prudently calculated attributable profit is recognised in the profit and loss account as the difference between the reported turnover and related costs for that contract.

The amount by which recorded turnover is in excess of payments on account is classified as 'amounts recoverable on contracts' and separately disclosed within debtors.

The balance of payments on account (in excess of amounts (i) matched with turnover; and (ii) offset against long-term contract balances) is classified as payments on account and separately disclosed within creditors.

Provisions
Provisions are recognised when the company has a legal or constructive obligation at the reporting date as a result of a past event, it is probable that the company will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are recognised at the best estimate of the amount required to settle the obligation at the reporting date.

Impairment of non financial assets
At each reporting date non-financial assets not carried at fair value, like goodwill and plant, property and equipment, are reviewed to determine whether there is an indication that an asset may be impaired. If there is an indication of possible impairment, the recoverable amount of any asset or group of related assets, which is the higher of value in use and the fair value less cost to sell, is estimated and compared with its carrying amount. If the recoverable amount is lower, the carrying amount of the asset is reduced to its recoverable amount and an impairment loss is recognised immediately in profit or loss.

Inventories are also assessed for impairment at each reporting date. The carrying amount of each item of inventory, or group of similar items, is compared with its selling price less costs to complete and sell. If an item of inventory or group of similar items is impaired, its carrying amount is reduced to selling price less costs to complete and sell, and an impairment loss is recognised immediately in profit or loss.

If an impairment loss is subsequently reversed, the carrying amount of the asset or group of related assets is increased to the revised estimate of its recoverable amount, but not to exceed the amount that would have been determined had no impairment loss been recognised for the asset or group of related assets in prior periods. A reversal of an impairment loss is recognised immediately in profit or loss.

Employee benefits
The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of stock or fixed assets.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the, company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

Dividends
Equity dividends are recognised when they become legally payable. Interim equity dividends are recognised when paid.
Final equity dividends are recognised when approved by the shareholders at various board meetings throughout the year.

4. **EMPLOYEES AND DIRECTORS**

The average number of employees during the period was 19 (2025 - 20) .
